

CallPlus broadband delivers speeds as fast as your line will go! All our Pro plans use ADSL2+, which delivers speed up to 24 Mbps. However, this speed is dependant on your premise wiring and the distance from your local exchange.

If your exchange has been upgraded you can expect speeds to be twice as fast as ADSL. Your broadband speed is also affected by how close your house is to your local exchange or roadside cabinet, your internal premise wiring, computer and modem capability, and your type of phone line and its condition. You can check your broadband speed by going to the CallPlus website, <http://www.callplus.co.nz/SpeedTest.aspx>

## Data management

**AUTO DATA BLOCKS:** This option maintains your broadband plan speed and you will be billed additional Data Blocks (5GB for \$10 or 10GB for \$10) over your monthly data allowance. You will be automatically notified by email once you reach 75% and 100% of your monthly data allowance and again every time you reach the 5GB or 10GB data block limit.

## Installation

**FREE INSTALLATION** Free connection to your local exchange (worth \$88) on all broadband plans. A full installation option is available for an additional \$145 (normally \$220).

**FREE ROUTER** our wired kit comes with a 1 port ADSL2+ router, a filter, an ADSL cable, power adaptor, Ethernet cable and preconfigured with your internet user name and password.

**WIRELESS ROUTER** is available for \$25 on a 24 month contract
