

## Call Waiting User Guide

### To switch between calls

Press the switch hook briefly or the "flash" or "recall" button. You can do this to switch between the calls as often as you like. Each call will be private - the caller on hold will hear the holding tone.

### Ignore the call

The caller will presume there is no answer and hang up or they will be diverted to your messaging service if you use one.

### To finish the call

Hang up - the phone will ring with the second caller.

### To suspend Call Waiting

You can only suspend Call Waiting for the duration of one call.

1. Lift handset
2. Dial \*52
3. Dial the number

To activate during the call:

1. Press the switchhook briefly or the "flash" or "recall" button.
2. Dial \*52
3. Continue conversation
